Remedial Pre-Remedial Activities DW.docx

Liz and I came up with this.

Subject: Upper Animas RI Related Work

Brent, Dan and Liz – The EPA Region 8 Gold King Mine Leadership Team has asked me to compile a concise list of RI-type activities we are currently conducting or that we plan to conduct through the end of next year. This is for a meeting this coming Monday, the 28th, at 2:00pm.

I apologize for having to make this request when you are all working on other important issues, but it is necessary for me to present this work to the Leadership Team in the proper context relative to other ongoing response work. In an effort to make this exercise less burdensome, I've attached a template with some example information. Please use this tool to summarize the activities you are conducting or coordinating.

Let me know if you have any questions on this, and thanks in advance for your help.

Steve
